MSDS sheets basically contain the same information as SDS, but the language and organization of information can be different. However, both MSDS and SDS are data sheets that describe the properties and dangers of a chemical and use the European Union standard symbols for hazards. The MSDS or SDS for a chemical mixture, composing or pointing to workers dealing with a substance in an occupational environment or those who need to transport/almacenaar a chemical or treat with accidents. For this reason, the data sheet may not be easily read by a secular person. Some products with identical names and sold by the same company may have different formulations, depending on the country. Similarly, generic products can vary in the composition of brand products. For this reason, one should not assume that security data sheets are necessarily interchangeable between countries or products. A SDS follows the globally harmonized classification and labelling system of chemicals. This is a 16 section format, written in English, containing the following facts in the specified order:
Section 1: Identification of the substance/mixture and of the company/company.1. Product ID 1.2. Relevant identified uses of the substance or mixture and recommended uses against 1.3. Security data sheet supplier details 1.4. Emergency telephone number
Section 2: Risk identification2.1. Classification of substance or mixture 2.2. Label elements 2.3. Other risks
Section 3: Composition/information on ingredients3.1. Substances 3.2. Mixed
Section 4: First aid measures4.1. Description of first aid measures 4.2. Symptoms and effects5.important, both acute and delayed 4 4 4 4.3. Indication of any immediate medical attention and special treatment necessary
section 5: Fire extinguish measures 5.1. Extinction extinction 5.2. Special hazards arising from the substance or mixture 5.3. Advice for firefighters
SECTION 6: Accidental release measure6.1. Personal precautions, protective equipment and emergency procedures 6.2. Environmental precautions 6.3. Methods and material for containment and cleaning up 6.4. Reference to other sections
SECTION 7: Handling and storage7.1. Precautions for safe handling 7.2. Conditions for safe storage, including any incompatibilities 7.3. Specific end use(s)
SECTION 8: Exposure controls/personal protection8.1. Control parameters 8.2. Exposure controls
SECTION 9: Physical and chemical properties9.1. Information on basic physical and chemical properties 9.2. Other information
SECTION 10: Stability and reactivity10.1. Reactivity 10.2. Chemical stability 10.3. Possibility of hazardous reactions 10.4. Conditions to avoid 10.5. Incompatible materials 10.6. Hazardous decomposition products
SECTION 11: Toxicological information11.1. Information on toxicological effects
SECTION 12: Ecological information12.1. Toxicity 12.2. Persistence and degradability 12.3. Bioaccumulative potential 12.4. Mobility in soil 12.5. Results of PBT and vPvB assessment 12.6. Other adverse effects
SECTION 13: Disposal considerations13.1. Waste treatment methods
SECTION 14: Transport information14.1. UN number 14.2. UN proper shipping name 14.3. Transport hazard class(es) 14.4. Packing group 14.5. Environmental hazards 14.6. Special precautions for user 14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code
SECTION 15: Regulatory information15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture 15.2. Chemical safety assessment
SECTION 16: Other information16.2. Date of the latest revision of the SDS
In the United States, the Occupational Safety and Health Administration (OSHA) requires employers make SDSs available to all employees that handle potentially hazardous In addition, SDSS should be available to local fire department, local emergency planning officials and state planning officials. When a dangerous chemical is purchased, the supplier must send SDS information. While this can be printed, it is more often available online. Companies that supply hazardous chemicals generally use a service that writes and updates data sheets. If you don't have a data sheet for a chemical, you can search it online. The University of California organizes the search for SDS Google.
